## **GEF Country Support Program for Focal Points Summary of Needs Assessment**

A detailed needs assessment was developed based on feedback from GEF Focal Points (FPs) during the eight sub-regional consultations held by the GEF National Dialogue Initiative between April and August 2006.

This summary reflects priority Focal Point needs and requests identified in the consultations and the responses proposed to address them. These responses are based on recommendations made by GEF Focal Points during the consultations.

The GEF will respond to these needs through the following mechanisms:

- Direct support (DS) through the Country Support Program (CSP);
- The GEF online knowledge management framework (KMF) a "one-stop" GEF focal point web portal, and/or
- Sub-regional workshops to be held in 2007-2009

Focal Point needs and queries	CSP proposed responses
General GEF topics	re programme and a second
Project cycle should be more rapid, effective, and efficient.	• KMF will provide GEF FP-tailored explanations of GEF project cycle, the RAF and the project cycle, and the roles and responsibilities of the OFPs throughout the project cycle.
Clarify roles and responsibilities of IAs/EAs.	<ul> <li>GEF Focal Point handbook and KMF to provide information on IAs/EAs roles and responsibilities.</li> <li>Workshops and National Dialogues to include IA/EA representatives for greater interaction with GEF FPs about their roles.</li> </ul>
Lack of familiarity with new adaptation funds.	Workshop modules and KMF guidance materials on development and use of adaptation funds and implementation of adaptation projects.
Resource Allocation Framework (RAF) in GEF4	
<ul> <li>Perceptions that countries were not consulted about the RAF and that the RAF was not supported by a majority of the GEF Council.</li> <li>Disclosure and transparency regarding RAF allocations and indices, how they were determined and applied, and future changes.</li> </ul>	• KMF will include briefing on the evolution, negotiations, and approval of the RAF with direct links to GEFSec website RAF page.
RAF covers biodiversity and climate change, but what about other focal areas, especially land degradation, and about synergies among focal areas?	KMF guidance tailored to GEF FPs on enhancing synergies among focal areas and developing land degradation, POPS, international waters, and adaptation projects.
Country and stakeholder participation in mid- term and 4-year evaluations, and whether evaluations will affect RAF implementation.  GEF focal points	• In conjunction with GEF Evaluation Office, KMF to provide opportunity to provide feedback on implementation of the RAF and guidance to GEF FPs as necessary.
Clarify roles and responsibilities of OFPs,	Focal point handbook to provide clear statement of GEF FP
PFPs, and convention focal points.	roles and responsibilities and relations with convention GEF FPs.
Excessive OFP workload and burden.  Specific CSP issues	<ul> <li>Provide guidance on using DS funds most effectively towards alleviating OFP burden.</li> <li>Workshop module on OFP facilitation role with presentations by experienced OFPs on dealing with workload.</li> </ul>

Mow to access and use \$8000 in direct support?
Consider development of streamlined version of toolkit and other guidance to be available through KMF. Convey FP concerns to GEFSec for further action.  GEF-NGO paper proposes extension of CSP to civil society. Both OFPs and FPFs will participate in sub-regional workshops.  KMF to address liaison with convention focal points and link directly with GEF NGO Network and Small Grants Program.  Knowledge management and institutional memory  Institutional memory is lost with OFP and staff turnover.  Staff turnover.  Description of truther action.  Convey FP concerns to GEFSec for further action.  Both OFPs and FPFs will participate in sub-regional workshops.
